## ABOUT ME

My full name is Danilo de Souza Carvalho, I'm 31 y/o, I was born in Cuiabá, Brazil. I've been working with development for more than 8 years. I started my career programming with PHP, and later I became a full stack developer, working with others projects using back-end languages such as NodeJS and front-end languages/libraries such as Angular/ReactJS. I have experience creating and implementing Web API and Rest Services. I also work with several databases and some platform such as Docker.

I truly believe in continued education and research and continue to seek new software methods to assist with product development. I hope to bring my knowledge, and future knowledge, to your organization.
